

Atlantic Swordfish Landings Update: Commercial and Recreational 2011 Fishing Year

The table below provides preliminary landings estimates and remaining quotas as of March 31, 2011, in pounds (lb) and metric tons (mt) dressed weight (dw) for the Atlantic swordfish fisheries for the 2011 fishing year. Landings are estimated using commercial dealer reports and reports by anglers in the HMS Non-Tournament Recreational Swordfish and Billfish Landings Database and the Recreational Billfish Survey. Please note that these estimates are subject to late reporting and do not include discards. As specified in § 635.27(c)(i)(B), all recreational landings are counted against the incidental quota. The 2011 annual directed landings quota seen below has not been adjusted for 2010 underharvests; NMFS is currently working on a proposed rule to adjust the 2011 base quota for these underharvests.

	Baseline Quota mt dw		Landings	Percent of Baseline Quota Taken
