

**NOAA
FISHERIES**

Recreational Fisheries Discussion

Regional Fishery Management Council Training

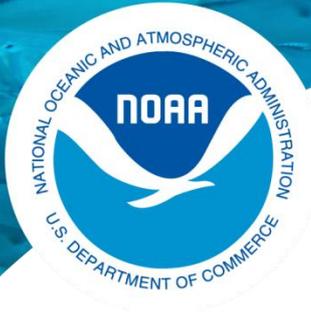

October 27-29, 2015

NOAA
FISHERIES

Discussion Outline

- Community Description & Perspective
- Recreational Fisheries Management Tools
- National Saltwater Recreational Fisheries Policy
- Recent Activity in Data Improvement
- Looking Forward

NOAA
FISHERIES

Magnuson-Stevens Fishery Conservation and Management Act

Purpose

“...to **promote** domestic commercial and **recreational fishing** under sound conservation and management principles.”

Recreational Fisheries & Community

Recreational Fishing Community

2013 Saltwater Recreational Fisheries Economic Impacts

**NOAA
FISHERIES**

**72 million
Trips**

**\$25 billion
Trip and Durables Expenditures**

**\$52 billion
Sales Impacts**

More than just an enjoyable way to spend time with friends and family...

NOAA
FISHERIES

Managing Recreational & Commercial Fishing

What's the big difference?

Priorities

Commercial

- *Efficiency*
- *Profit*

Recreational

- *Opportunity*
- *Access*
- *Outdoor Experience*

Tools for Managing Recreational Fisheries

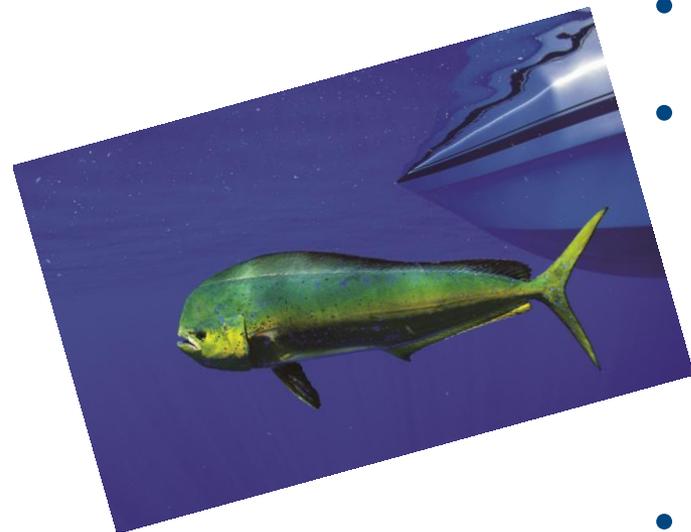

NOAA
FISHERIES

Management Toolbox

Primary Tools

- Quota allocation and annual catch limits
- Seasonal fishery openings/closures
- Area closures
- Possession limits by species and/or species complex
 - Number of fish per angler/vessel/trip/day
 - Species prohibitions (e.g., great white sharks)
- Size limits by species
 - Minimum or maximum sizes and slot limits

**NOAA
FISHERIES**

Management Toolbox (continued)

Secondary Tools *Gear restrictions*

- Gear prohibitions (e.g., nets, fish traps, etc.)
- Gear requirements (e.g., circle hooks, release gears)

Tertiary Tools Practices

- Prohibition on removal from the water
- Release in a manner that maximizes probability of survival
- Landing condition to facilitate species identification (e.g., *heads/tails intact*)
- Restrictions on sale/purchase

The background image is a blurred, light blue-toned photograph of a ship's deck. In the foreground, there are various pieces of equipment, including a white cylindrical device on a pole, a control panel with several buttons, and a pair of glasses hanging from a railing. The ocean is visible in the background, with gentle waves. The overall scene suggests a maritime or research environment.

NOAA's Commitment

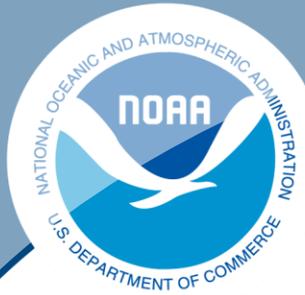

NOAA
FISHERIES
United States

NOAA's Commitment to Anglers

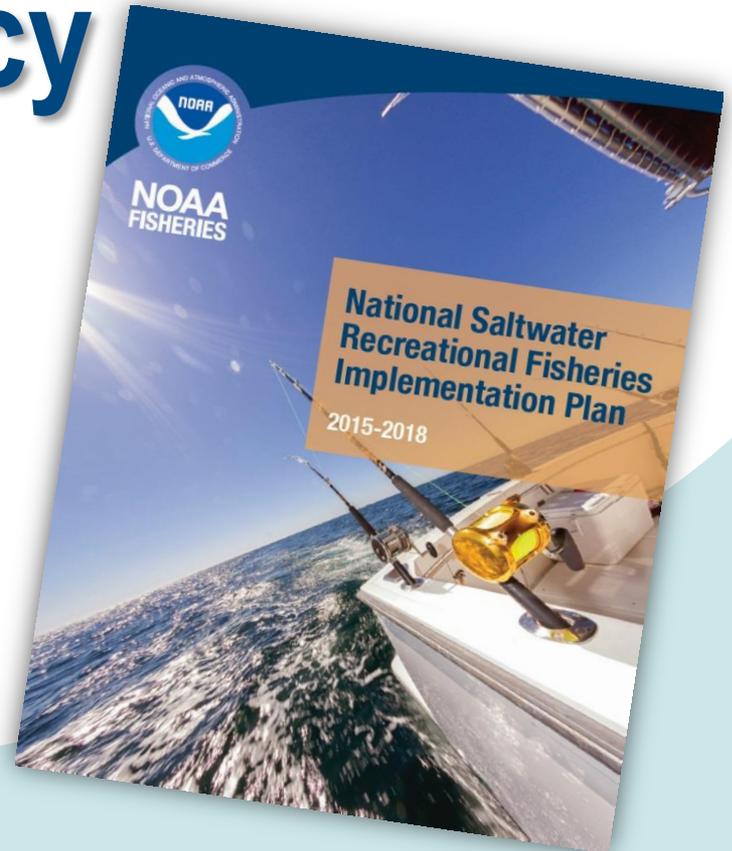

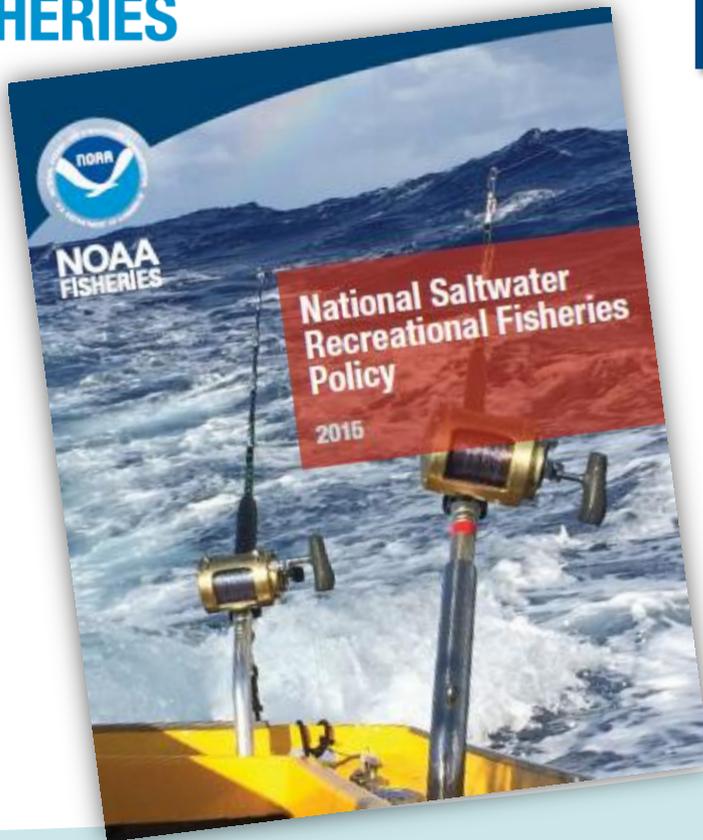

Establish and maintain a strong and trusting partnership with the recreational fishing community through action

**NOAA
FISHERIES**

National Saltwater Recreational Fisheries Policy

**NOAA
FISHERIES**

It is the policy of NMFS to:

“...foster, support, and enhance a broadly accessible and diverse array of sustainable saltwater recreational fisheries for the benefit and enjoyment of the nation.”

Goals

- 1. Support and maintain sustainable saltwater recreational fisheries resources, including habitats**
- 2. Promote saltwater recreational fishing for the benefit of the nation**
- 3. Enable enduring participation in saltwater recreational fishing through science-based conservation and management**

Guiding Principles

- 1. Support ecosystem conservation and enhancement**
 - Restoration, conservation, enhancement of habitat
- 2. Promote public access to quality recreational fishing opportunities**
 - Expand fishing opportunities based on conservation gains
- 3. Coordinate with state and federal management entities**
 - Aligning program goals and implementation strategies

Guiding Principles

- 4. Advance innovative solutions to evolving science, management, and environmental challenges**
 - Cutting edge tools
- 5. Provide scientifically sound and trusted social, cultural, economic, and ecological information**
 - Partnering with external interests; engaging in cooperative research
- 6. Communicate and engage with the recreational fishing public**
 - Expanded regional engagement

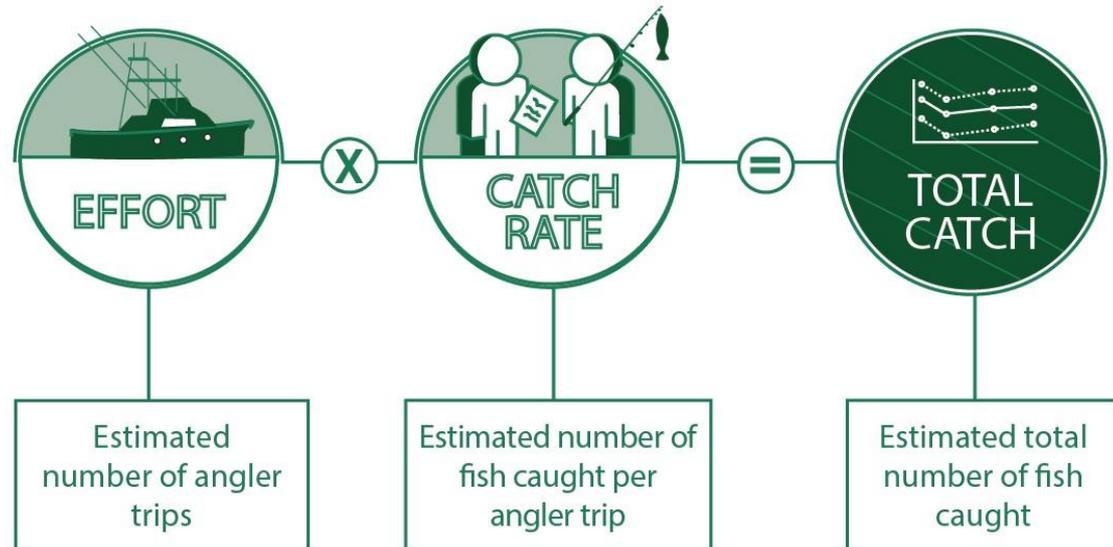

Recreational Data

NOAA
FISHERIES

Recreational Data *Catch & Effort*

Most recreational catch data is estimated from data collected in surveys that sample fishing activity in two phases:

Detailed descriptions of survey methods and catch estimates can be found at:

www.CountMyFish.noaa.gov

NOAA
FISHERIES

Importance of Data Quality

If we over-estimate harvest...

Lower Catch Limits

Fewer fishing opportunities

If we under-estimate harvest...

Overfishing

Less fish available to catch

**NOAA
FISHERIES**

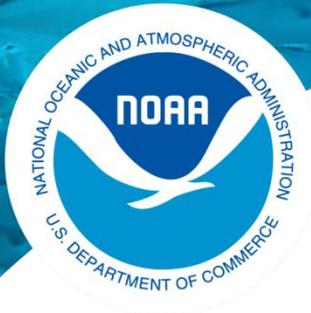

The Marine Recreational Information Program

The improved way of collecting and reporting recreational fishing catch and effort data.

MRIP plays a critical role in sustainably managing our ocean resources by providing estimates of fishing activity that are both **accurate** and **trusted**.

Find out how at www.CountMyFish.noaa.gov.

**NOAA
FISHERIES**

From Testing to Implementation

● **Rigorous examination of data collections and testing improvements.**

● **Implementation and fine-tuning.**

New catch estimation method

New angler catch survey

New fishing effort survey

● **Address customer needs for timeliness, precision, geographic scale, special needs fisheries.**

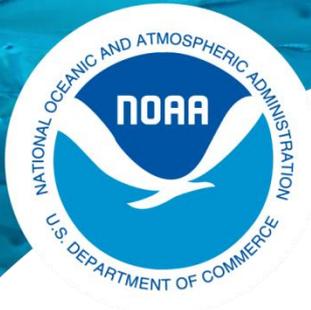

**NOAA
FISHERIES**

Dynamic and Evolving for the Better

Ongoing work includes:

- Replacing telephone effort surveys.
- Alternatives for collecting and reporting data from the for-hire sector.
- New and improved survey methods for the Pacific coast, Hawaii, Puerto Rico and the U.S. Virgin Islands
- Methods to ensure we're accurately capturing HMS activity.
- Evaluating new methods to collect more timely and precise estimates for pulse and rare event fisheries, such as red snapper, including use of electronic reporting technologies.

As changes are made, we are working with managers, scientists and anglers to best integrate new information into stock assessments and management.

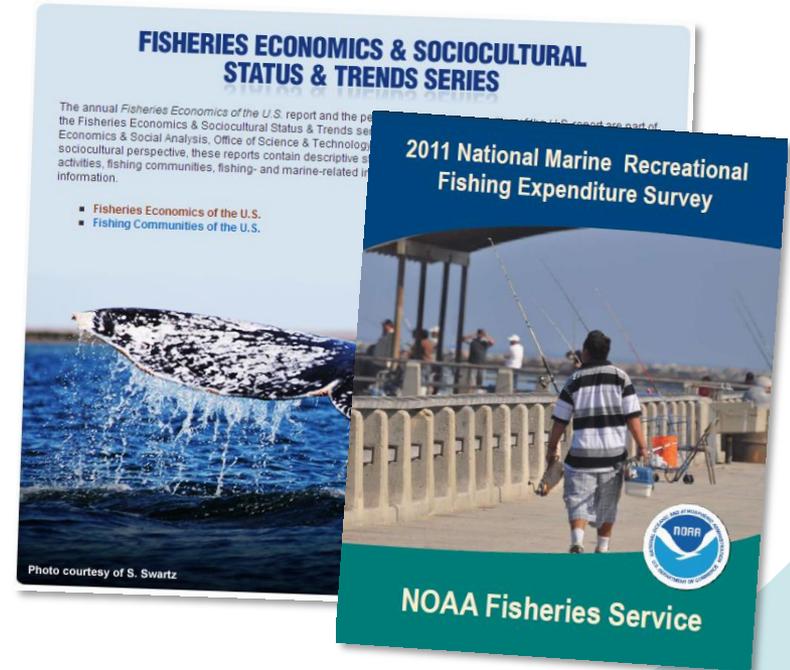

**NOAA
FISHERIES**

Recreational Data *Socio-economics*

Data for decision-making

- National Angler Perceptions and Motivations Survey
- Nationwide Angler Expenditure Survey
- National Bait & Tackle economic survey
- Atlantic HMS Tournament Economic Survey

More information and to learn about economic resources you can use, check us out online at:
www.st.nmfs.noaa.gov/st5

A blurred, light blue-tinted photograph of a boat's deck and the ocean. The text "Looking Forward" is overlaid in a dark teal color. The background shows the boat's railing, a compass or electronic display on a pole, and the sea with a white wake. The overall mood is serene and forward-looking.

Looking Forward

On the Horizon in 2016

**NOAA
FISHERIES**

- **Regional Saltwater Recreational Fisheries Implementation Plans (Early 2016)**
- **Artificial Reef Workshop (Summer 2016)**
- **National Research Council Review of MRIP (Late 2016)**
