

Please provide the following information, and submit to the NOAA DM Plan Repository.

Reference to Master DM Plan (if applicable)

As stated in Section IV, Requirement 1.3, DM Plans may be hierarchical. If this DM Plan inherits provisions from a higher-level DM Plan already submitted to the Repository, then this more-specific Plan only needs to provide information that differs from what was provided in the Master DM Plan.

URL of higher-level DM Plan (if any) as submitted to DM Plan Repository:

1. General Description of Data to be Managed

1.1. Name of the Data, data collection Project, or data-producing Program:

Central Gulf of Alaska Rockfish Permit Program

1.2. Summary description of the data:

The North Pacific Fishery Management Council adopted the Central Gulf of Alaska Rockfish Program (Rockfish Program) on June 14, 2010, to replace the expiring Pilot Program. The Rockfish Program became effective in 2011 and fishing under it began in 2012.

The rockfish fisheries are conducted in Federal waters near Kodiak, Alaska, by trawl and longline vessels. The Rockfish Program allocates harvest privileges to holders of License Limitation Program (LLP) groundfish licenses with a history of Central GOA rockfish legal landings in either 2000 through 2006, or the entry level trawl fishery in 2007, 2008, or 2009.

The Rockfish Program assigns quota share (QS) to LLP licenses for rockfish primary and secondary species based on legal landings associated with that LLP. Primary rockfish species are northern rockfish, Pacific ocean perch, and pelagic shelf rockfish. Secondary rockfish species are Pacific cod, rougheye rockfish, shortraker rockfish, sablefish, and thornyhead rockfish.

Each year, an LLP license holder assigns the LLP license with rockfish QS to a rockfish cooperative. Each rockfish cooperative receives an annual cooperative fishing quota (CQ), which is an amount of primary and secondary rockfish species the cooperative is able to harvest in that fishing year. Halibut Prohibited Species Catch (PSC) is also allocated to participants based on historic halibut mortality rates in the primary rockfish species fisheries. Shore-based processors receiving rockfish CQ must be located within the boundaries of the City of Kodiak. The rockfish cooperative fishing season is authorized May 1 through November 15 of each year. An entry level fishery starts January 1 of each year for harvesters who are directed fishing for rockfish primary species using longline gear only.

Catcher/processor LLP license holders may opt-out of the Rockfish Program but are subject to certain sideboard limitations, which prevent rockfish eligible harvesters from increasing their participation in fisheries other than the Central GOA rockfish fisheries.

1.3. Is this a one-time data collection, or an ongoing series of measurements?

Ongoing series of measurements

1.4. Actual or planned temporal coverage of the data:

2012-03-01 to Present

1.5. Actual or planned geographic coverage of the data:

GOA

1.6. Type(s) of data:

(e.g., digital numeric data, imagery, photographs, video, audio, database, tabular data, etc.)

Document (digital)

1.7. Data collection method(s):

(e.g., satellite, airplane, unmanned aerial system, radar, weather station, moored buoy, research vessel, autonomous underwater vehicle, animal tagging, manual surveys, enforcement activities, numerical model, etc.)

1.8. If data are from a NOAA Observing System of Record, indicate name of system:**1.8.1. If data are from another observing system, please specify:****2. Point of Contact for this Data Management Plan (author or maintainer)****2.1. Name:**

Tracy Buck

2.2. Title:

Metadata Contact

2.3. Affiliation or facility:**2.4. E-mail address:**

tracy.buck@noaa.gov

2.5. Phone number:

907-586-7889

3. Responsible Party for Data Management

Program Managers, or their designee, shall be responsible for assuring the proper management of the data produced by their Program. Please indicate the responsible party below.

3.1. Name:

Tracy Buck

3.2. Title:

Data Steward

4. Resources

Programs must identify resources within their own budget for managing the data they produce.

4.1. Have resources for management of these data been identified?

No

4.2. Approximate percentage of the budget for these data devoted to data management (specify percentage or "unknown"):

Cost Recovery

5. Data Lineage and Quality

NOAA has issued Information Quality Guidelines for ensuring and maximizing the quality, objectivity, utility, and integrity of information which it disseminates.

5.1. Processing workflow of the data from collection or acquisition to making it publicly accessible

(describe or provide URL of description):

Lineage Statement:

Information is collected from participants on paper applications or, if allowed, through on-line data submissions in NMFS/AKR eFISH on-line services. Harvest data necessary for real-time account management may also be submitted through eLandings. Information submitted on paper forms is entered/updated through NMFS/AKR Alaska Data Entry and Retrieval System (ALDERS) by permitting staff. Data entered into ALDERS is stored in appropriate database tables for use in generating permits, reports, views, etc.

5.1.1. If data at different stages of the workflow, or products derived from these data, are subject to a separate data management plan, provide reference to other plan:

5.2. Quality control procedures employed (describe or provide URL of description):

Submitted data is reviewed by NMFS staff prior to data entry. Source data are validated against business rules when loaded into NMFS' Oracle database. Data input is reviewed against output on a routine basis to ensure quality.

6. Data Documentation

The EDMC Data Documentation Procedural Directive requires that NOAA data be well documented, specifies the use of ISO 19115 and related standards for documentation of new data, and provides links to resources and tools for metadata creation and validation.

6.1. Does metadata comply with EDMC Data Documentation directive?

No

6.1.1. If metadata are non-existent or non-compliant, please explain:

Missing/invalid information:

- 1.7. Data collection method(s)

6.2. Name of organization or facility providing metadata hosting:

NMFS Office of Science and Technology

6.2.1. If service is needed for metadata hosting, please indicate:**6.3. URL of metadata folder or data catalog, if known:**

<https://www.fisheries.noaa.gov/inport/item/25892>

6.4. Process for producing and maintaining metadata

(describe or provide URL of description):

Metadata produced and maintained in accordance with the NOAA Data Documentation Procedural Directive:

https://nosc.noaa.gov/EDMC/DAARWG/docs/EDMC_PD-Data_Documentation_v1.pdf

7. Data Access

NAO 212-15 states that access to environmental data may only be restricted when distribution is explicitly limited by law, regulation, policy (such as those applicable to personally identifiable information or protected critical infrastructure information or proprietary trade information) or by security requirements. The EDMC Data Access Procedural Directive contains specific guidance, recommends the use of open-standard, interoperable, non-proprietary web services, provides information about resources and tools to enable data access, and includes a Waiver to be submitted to justify any approach other than full, unrestricted public access.

7.1. Do these data comply with the Data Access directive?

No

7.1.1. If the data are not to be made available to the public at all, or with limitations, has a Waiver (Appendix A of Data Access directive) been filed?

No

7.1.2. If there are limitations to public data access, describe how data are protected from unauthorized access or disclosure:

Data are sensitive under the Privacy Act, FOIA and Magnuson-Stevens Fishery Conservation and Management Reauthorization Act (2007) and can only be shared with authorized persons or in summary format for public dissemination.

7.2. Name of organization of facility providing data access:

Alaska Regional Office (AKRO)

7.2.1. If data hosting service is needed, please indicate:

unknown

7.2.2. URL of data access service, if known:

https://alaskafisheries.noaa.gov/permits-licenses?field_fishery_pm_value=Central+GOA+Rockfish

7.3. Data access methods or services offered:

Access to sensitive data shall only be granted to an individual that meets certain criteria. Access may be granted to the data submitter. Access can only be granted to

a non-submitter if a signed and effective Confidentiality Agreement, Data Access Sharing Agreement, Memorandum of Understanding, Standard Statement of Nondisclosure, or similar agreement is in place. These signed agreements shall indicate that individuals have reviewed and understand the provisions in the manual governing the legal use of sensitive data. The signed agreements are maintained by the Alaska Regional Records office. The name of each individual that has signed a statement of nondisclosure for or using sensitive data will be added to the Alaska Region list of authorized confidential data users.

Data may be released if aggregated in accordance with AKRO and/or MSA confidentiality protocols. Data may be released if confidential BII or PII information are re-dacted. .

7.4. Approximate delay between data collection and dissemination:

6-25 years

7.4.1. If delay is longer than latency of automated processing, indicate under what authority data access is delayed:

8. Data Preservation and Protection

The NOAA Procedure for Scientific Records Appraisal and Archive Approval describes how to identify, appraise and decide what scientific records are to be preserved in a NOAA archive.

8.1. Actual or planned long-term data archive location:

(Specify NCEI-MD, NCEI-CO, NCEI-NC, NCEI-MS, World Data Center (WDC) facility, Other, To Be Determined, Unable to Archive, or No Archiving Intended)

OTHER

8.1.1. If World Data Center or Other, specify:

8.1.2. If To Be Determined, Unable to Archive or No Archiving Intended, explain:

8.2. Data storage facility prior to being sent to an archive facility (if any):

Alaska Regional Office - Juneau, AK

8.3. Approximate delay between data collection and submission to an archive facility:

35 days

8.4. How will the data be protected from accidental or malicious modification or deletion prior to receipt by the archive?

Discuss data back-up, disaster recovery/contingency planning, and off-site data storage relevant to the data collection

IT Security and Contingency Plan for the system establishes procedures and applies to the functions, operations, and resources necessary to recover and restore data as hosted in the Alaska Region in Juneau, Alaska, following a disruption.

9. Additional Line Office or Staff Office Questions

Line and Staff Offices may extend this template by inserting additional questions in this section.
