

Please provide the following information, and submit to the NOAA DM Plan Repository.

### Reference to Master DM Plan (if applicable)

As stated in Section IV, Requirement 1.3, DM Plans may be hierarchical. If this DM Plan inherits provisions from a higher-level DM Plan already submitted to the Repository, then this more-specific Plan only needs to provide information that differs from what was provided in the Master DM Plan.

URL of higher-level DM Plan (if any) as submitted to DM Plan Repository:

## 1. General Description of Data to be Managed

### 1.1. Name of the Data, data collection Project, or data-producing Program:

Data logger database - Physical and biological effects of fish-friendly tide gates

### 1.2. Summary description of the data:

The purpose of this one-time stand-alone study is to evaluate how effective "fish-friendly" or self-regulating tide gates (SRTs) are at increasing connectivity for fish rearing in estuaries. The work was carried out in North Puget Sound, Washington Coast, and Columbia River estuaries by Correigh Greene, Jason Hall, and Eric Beamer (Skagit River System Cooperative), and compared SRTs with traditional flap gates and reference sites that were not blocked by any tide gate. Thus far, the study has produced a report for ESRP (Estuary Salmon Restoration Program), the organization that funded it. Up to two peer-reviewed papers are planned. The audience for this work includes federal and state managers, local planners, Watershed Councils, and applied ecologists.

Access database of data loggers.

### 1.3. Is this a one-time data collection, or an ongoing series of measurements?

One-time data collection

### 1.4. Actual or planned temporal coverage of the data:

2009-09-01 to 2012-01-31, 2009-09-01 to 2012-01-31, 2009-09-01 to 2012-01-31, 2009-09-01 to 2012-01-31, 2009-09-01 to 2012-01-31

### 1.5. Actual or planned geographic coverage of the data:

W: -123.8897, E: -123.8897, N: 46.1642, S: 46.1642

Young's Bay: Young's Bay worksite contains 1 reference, 1 SRT, and 1 Flap Gate site.

W: -122.4197, E: -122.4197, N: 48.597, S: 48.597

Samish Bay: Samish Bay worksite contains 1 reference, 2 SRT, and 1 Flap Gate site.

W: -123.8045, E: -123.8045, N: 46.9711, S: 46.9711

Chehalis Estuary: Chehalis Estuary worksite contains 1 reference, 3 SRT, and 1 Flap Gate site.

W: -122.5025, E: -122.5025, N: 48.4351, S: 48.4351

Swinomish Channel: Swinomish Channel worksite contains 1 reference, 2 SRT, and 1 Flap Gate site.

W: -122.3438, E: -122.3438, N: 48.3238, S: 48.3238

Skagit Estuary: Skagit Estuary worksite contains 1 reference, 1 SRT, and 1 Flap Gate site.

**1.6. Type(s) of data:**

*(e.g., digital numeric data, imagery, photographs, video, audio, database, tabular data, etc.)*

Table (digital)

**1.7. Data collection method(s):**

*(e.g., satellite, airplane, unmanned aerial system, radar, weather station, moored buoy, research vessel, autonomous underwater vehicle, animal tagging, manual surveys, enforcement activities, numerical model, etc.)*

**1.8. If data are from a NOAA Observing System of Record, indicate name of system:**

**1.8.1. If data are from another observing system, please specify:**

**2. Point of Contact for this Data Management Plan (author or maintainer)**

**2.1. Name:**

Northwest Fisheries Science Center (NWFSC)

**2.2. Title:**

Metadata Contact

**2.3. Affiliation or facility:**

Northwest Fisheries Science Center (NWFSC)

**2.4. E-mail address:**

nmfs.nwfsc.metadata@noaa.gov

**2.5. Phone number:**

206-860-3200

**3. Responsible Party for Data Management**

*Program Managers, or their designee, shall be responsible for assuring the proper management of the data produced by their Program. Please indicate the responsible party below.*

**3.1. Name:**

Correigh Greene

**3.2. Title:**

Data Steward

**4. Resources**

*Programs must identify resources within their own budget for managing the data they produce.*

**4.1. Have resources for management of these data been identified?**

Yes

**4.2. Approximate percentage of the budget for these data devoted to data management (specify percentage or "unknown"):**

15

**5. Data Lineage and Quality**

*NOAA has issued Information Quality Guidelines for ensuring and maximizing the quality, objectivity, utility, and integrity of information which it disseminates.*

**5.1. Processing workflow of the data from collection or acquisition to making it publicly accessible**

*(describe or provide URL of description):*

Lineage Statement:

Summaries by time and location

**5.1.1. If data at different stages of the workflow, or products derived from these data, are subject to a separate data management plan, provide reference to other plan:**

**5.2. Quality control procedures employed (describe or provide URL of description):**

Examination of ranges for outliers. These data were collected and processed in accordance with established protocols and best practices under the direction of the project's Principal Investigator. Contact the dataset Data Manager for full QA/QC methodology.

**6. Data Documentation**

*The EDMC Data Documentation Procedural Directive requires that NOAA data be well documented, specifies the use of ISO 19115 and related standards for documentation of new data, and provides links to resources and tools for metadata creation and validation.*

**6.1. Does metadata comply with EDMC Data Documentation directive?**

No

**6.1.1. If metadata are non-existent or non-compliant, please explain:**

Missing/invalid information:

- 1.7. Data collection method(s)

**6.2. Name of organization or facility providing metadata hosting:**

NMFS Office of Science and Technology

**6.2.1. If service is needed for metadata hosting, please indicate:**

**6.3. URL of metadata folder or data catalog, if known:**

<https://www.fisheries.noaa.gov/inport/item/18067>

**6.4. Process for producing and maintaining metadata**

*(describe or provide URL of description):*

Metadata produced and maintained in accordance with the NOAA Data Documentation Procedural Directive:  
[https://nosc.noaa.gov/EDMC/DAARWG/docs/EDMC\\_PD-Data\\_Documentation\\_v1.pdf](https://nosc.noaa.gov/EDMC/DAARWG/docs/EDMC_PD-Data_Documentation_v1.pdf)

## 7. Data Access

*NAO 212-15 states that access to environmental data may only be restricted when distribution is explicitly limited by law, regulation, policy (such as those applicable to personally identifiable information or protected critical infrastructure information or proprietary trade information) or by security requirements. The EDMC Data Access Procedural Directive contains specific guidance, recommends the use of open-standard, interoperable, non-proprietary web services, provides information about resources and tools to enable data access, and includes a Waiver to be submitted to justify any approach other than full, unrestricted public access.*

### 7.1. Do these data comply with the Data Access directive?

Yes

#### 7.1.1. If the data are not to be made available to the public at all, or with limitations, has a Waiver (Appendix A of Data Access directive) been filed?

#### 7.1.2. If there are limitations to public data access, describe how data are protected from unauthorized access or disclosure:

### 7.2. Name of organization of facility providing data access:

Northwest Fisheries Science Center (NWFSC)

#### 7.2.1. If data hosting service is needed, please indicate:

No

#### 7.2.2. URL of data access service, if known:

[https://www.webapps.nwfsc.noaa.gov/apex/parr/physical\\_and\\_biological\\_effects\\_of\\_fishfriendly\\_tide](https://www.webapps.nwfsc.noaa.gov/apex/parr/physical_and_biological_effects_of_fishfriendly_tide)  
[https://www.webapps.nwfsc.noaa.gov/apex/parr/physical\\_and\\_biological\\_effects\\_of\\_fishfriendly\\_tide](https://www.webapps.nwfsc.noaa.gov/apex/parr/physical_and_biological_effects_of_fishfriendly_tide)  
[https://www.webapps.nwfsc.noaa.gov/apex/parr/physical\\_and\\_biological\\_effects\\_of\\_fishfriendly\\_tide](https://www.webapps.nwfsc.noaa.gov/apex/parr/physical_and_biological_effects_of_fishfriendly_tide)  
[https://www.webapps.nwfsc.noaa.gov/apex/parrdata/inventory/tables/table/physical\\_and\\_biological](https://www.webapps.nwfsc.noaa.gov/apex/parrdata/inventory/tables/table/physical_and_biological)  
[https://www.webapps.nwfsc.noaa.gov/apex/parrdata/inventory/tables/table/physical\\_and\\_biological](https://www.webapps.nwfsc.noaa.gov/apex/parrdata/inventory/tables/table/physical_and_biological)  
[https://www.webapps.nwfsc.noaa.gov/apex/parrdata/inventory/tables/table/physical\\_and\\_biological](https://www.webapps.nwfsc.noaa.gov/apex/parrdata/inventory/tables/table/physical_and_biological)

### 7.3. Data access methods or services offered:

At this time, contact the Data Manager for information on obtaining access to this data set. In the near future, the NWFSC will strive to provide all data resources as a web service in order to meet the NOAA Data Access Policy Directive (<https://nosc.noaa.gov/EDMC/PD.DA.php>).

### 7.4. Approximate delay between data collection and dissemination:

0 days

#### 7.4.1. If delay is longer than latency of automated processing, indicate under what authority data access is delayed:

No Delay

## 8. Data Preservation and Protection

*The NOAA Procedure for Scientific Records Appraisal and Archive Approval describes how to identify, appraise and decide what scientific records are to be preserved in a NOAA archive.*

### 8.1. Actual or planned long-term data archive location:

*(Specify NCEI-MD, NCEI-CO, NCEI-NC, NCEI-MS, World Data Center (WDC) facility, Other, To Be Determined, Unable to Archive, or No Archiving Intended)*

NCEI\_MD

#### 8.1.1. If World Data Center or Other, specify:

#### 8.1.2. If To Be Determined, Unable to Archive or No Archiving Intended, explain:

### 8.2. Data storage facility prior to being sent to an archive facility (if any):

Northwest Fisheries Science Center - Seattle, WA

### 8.3. Approximate delay between data collection and submission to an archive facility:

365

### 8.4. How will the data be protected from accidental or malicious modification or deletion prior to receipt by the archive?

*Discuss data back-up, disaster recovery/contingency planning, and off-site data storage relevant to the data collection*

The Northwest Fisheries Science Center facilitates backup and recovery of all data and IT components which are managed by IT Operations through the capture of static (point-in-time) backup data to physical media. Once data is captured to physical media (every 1-3 days), a duplicate is made and routinely (weekly) transported to an offsite archive facility where it is maintained throughout the data's applicable life-cycle.

## 9. Additional Line Office or Staff Office Questions

*Line and Staff Offices may extend this template by inserting additional questions in this section.*
