

Please provide the following information, and submit to the NOAA DM Plan Repository.

Reference to Master DM Plan (if applicable)

As stated in Section IV, Requirement 1.3, DM Plans may be hierarchical. If this DM Plan inherits provisions from a higher-level DM Plan already submitted to the Repository, then this more-specific Plan only needs to provide information that differs from what was provided in the Master DM Plan.

URL of higher-level DM Plan (if any) as submitted to DM Plan Repository:

1. General Description of Data to be Managed**1.1. Name of the Data, data collection Project, or data-producing Program:**

Elwha Master Datafile - Elwha dam removal neashore monitoring

1.2. Summary description of the data:

Removal of two dams on the Elwha River, Washington will help restore natural sediment processes to the coastal environment near the river mouth. We are interested in the responses of fish associated with shallow subtidal and intertidal habitats because they function as spawning and rearing habitat for many fish species including the ecologically important forage fish and federally protected species of Pacific salmon. Since 2006, we have been collecting species composition and size distribution of the intertidal/subtidal fish community in the Eastern and Central Strait of Juan de Fuca. Potential reference site and treatment sites (where sediment changes are expected to occur) were sampled on a monthly basis from April to September using a beach seine. We found over 45 species of fish, mostly juvenile stages, using this portion of the Strait of Juan de Fuca representing two groups- fish occurring in the water column and those living on or near the bottom. The water column species tended to be very abundant and included both migrants (e.g., juvenile salmon) and residents (surf smelt). Although the same species tended to be present each year, they often exhibited dramatic between year variability in abundance. This suggests the importance of using multiple years of data to evaluate changes resulting from dam removal. Treatment and reference areas exhibited some significant differences and we found seasonality in the fish assemblage structure. Our results suggest that some promising bio-indicators of short and long term change in sediment processes are: 1) numbers of species, 2) species diversity, 3) composition and sizes of benthic species, 4) abundance by life history stage of surf smelt, and 5) presence of migratory species like juvenile salmon. We will continue this work following dam removal to track the changes due to dam removal.

For this project, the data was stored in .xls and access files.

1.3. Is this a one-time data collection, or an ongoing series of measurements?

Ongoing series of measurements

1.4. Actual or planned temporal coverage of the data:

2004-03-01 to Present, 2004-03-01 to Present

1.5. Actual or planned geographic coverage of the data:

W: -122.3062, E: -122.3062, N: 47.6449, S: 47.6449

Sequim, WA: Elwha Nearshore

W: -122.3062, E: -122.3062, N: 47.6449, S: 47.6449

Port Angeles, WA: Elwha Nearshore

1.6. Type(s) of data:

(e.g., digital numeric data, imagery, photographs, video, audio, database, tabular data, etc.)

Table (digital)

1.7. Data collection method(s):

(e.g., satellite, airplane, unmanned aerial system, radar, weather station, moored buoy, research vessel, autonomous underwater vehicle, animal tagging, manual surveys, enforcement activities, numerical model, etc.)

1.8. If data are from a NOAA Observing System of Record, indicate name of system:

1.8.1. If data are from another observing system, please specify:

2. Point of Contact for this Data Management Plan (author or maintainer)

2.1. Name:

Metadata Contact

2.2. Title:

Metadata Contact

2.3. Affiliation or facility:

2.4. E-mail address:

nmfs.nwfsc.metadata@noaa.gov

2.5. Phone number:

(206) 860-3433

3. Responsible Party for Data Management

Program Managers, or their designee, shall be responsible for assuring the proper management of the data produced by their Program. Please indicate the responsible party below.

3.1. Name:

3.2. Title:

Data Steward

4. Resources

Programs must identify resources within their own budget for managing the data they produce.

4.1. Have resources for management of these data been identified?

No

4.2. Approximate percentage of the budget for these data devoted to data management (specify percentage or "unknown"):

30

5. Data Lineage and Quality

NOAA has issued Information Quality Guidelines for ensuring and maximizing the quality, objectivity, utility, and integrity of information which it disseminates.

5.1. Processing workflow of the data from collection or acquisition to making it publicly accessible

(describe or provide URL of description):

Lineage Statement:

Data was entered into access/xls files from datasheets. These data were collected and processed in accordance with established protocols and best practices under the direction of the projects Principal Investigator. Contact the dataset Data Manager for full QA/QC methodology.

5.1.1. If data at different stages of the workflow, or products derived from these data, are subject to a separate data management plan, provide reference to other plan:

5.2. Quality control procedures employed (describe or provide URL of description):

These data were collected and processed in accordance with established protocols and best practices under the direction of the projects Principal Investigator. Contact the dataset Data Manager in section 3 for full QA/QC methodology.

6. Data Documentation

The EDMC Data Documentation Procedural Directive requires that NOAA data be well documented, specifies the use of ISO 19115 and related standards for documentation of new data, and provides links to resources and tools for metadata creation and validation.

6.1. Does metadata comply with EDMC Data Documentation directive?

No

6.1.1. If metadata are non-existent or non-compliant, please explain:

Missing/invalid information:

- 1.7. Data collection method(s)
- 3.1. Responsible Party for Data Management

6.2. Name of organization or facility providing metadata hosting:

NMFS Office of Science and Technology

6.2.1. If service is needed for metadata hosting, please indicate:**6.3. URL of metadata folder or data catalog, if known:**

<https://www.fisheries.noaa.gov/inport/item/30856>

6.4. Process for producing and maintaining metadata

(describe or provide URL of description):

Metadata produced and maintained in accordance with the NOAA Data Documentation Procedural Directive: https://nosc.noaa.gov/EDMC/DAARWG/docs/EDMC_PD-Data_Documentation_v1.pdf

7. Data Access

NAO 212-15 states that access to environmental data may only be restricted when distribution is explicitly limited by law, regulation, policy (such as those applicable to personally identifiable information or protected critical infrastructure information or proprietary trade information) or by security requirements. The EDMC Data Access Procedural Directive contains specific guidance, recommends the use of open-standard, interoperable, non-proprietary web services, provides information about resources and tools to enable data access, and includes a Waiver to be submitted to justify any approach other than full, unrestricted public access.

7.1. Do these data comply with the Data Access directive?

Yes

7.1.1. If the data are not to be made available to the public at all, or with limitations, has a Waiver (Appendix A of Data Access directive) been filed?**7.1.2. If there are limitations to public data access, describe how data are protected from unauthorized access or disclosure:****7.2. Name of organization of facility providing data access:**

Northwest Fisheries Science Center (NWFS)

7.2.1. If data hosting service is needed, please indicate:

No

7.2.2. URL of data access service, if known:

https://www.webapps.nwfsc.noaa.gov/apex/parr/elwha_dam_removal_neashore_monitoring_catch_i
https://www.webapps.nwfsc.noaa.gov/apex/parr/elwha_dam_removal_neashore_monitoring_field_d
https://www.webapps.nwfsc.noaa.gov/apex/parr/elwha_dam_removal_neashore_monitoring_lab_res
https://www.webapps.nwfsc.noaa.gov/apex/parr/elwha_dam_removal_neashore_monitoring_net_set
https://www.webapps.nwfsc.noaa.gov/apex/parr/elwha_dam_removal_neashore_monitoring_of_sub
https://www.webapps.nwfsc.noaa.gov/apex/parr/elwha_dam_removal_neashore_monitoring_sites/d

https://www.webapps.nwfsc.noaa.gov/apex/parr/elwha_dam_removal_neashore_monitoring_species
<https://www.webapps.nwfsc.noaa.gov/apex/parrdata/inventory/datasets/dataset/19530>
https://www.webapps.nwfsc.noaa.gov/apex/parrdata/inventory/tables/table/elwha_dam_removal_ne
https://www.webapps.nwfsc.noaa.gov/apex/parrdata/inventory/tables/table/elwha_dam_removal_ne
https://www.webapps.nwfsc.noaa.gov/apex/parrdata/inventory/tables/table/elwha_dam_removal_ne
https://www.webapps.nwfsc.noaa.gov/apex/parrdata/inventory/tables/table/elwha_dam_removal_ne
https://www.webapps.nwfsc.noaa.gov/apex/parrdata/inventory/tables/table/elwha_dam_removal_ne
https://www.webapps.nwfsc.noaa.gov/apex/parrdata/inventory/tables/table/elwha_dam_removal_ne

7.3. Data access methods or services offered:

At this time, contact the Data Manager for information on obtaining access to this data set. In the near future, the NWFSC will strive to provide all non-sensitive data resources as a web service in order to meet the NOAA Data Access Policy Directive (<https://nosc.noaa.gov/EDMC/PD.DA.php>).

7.4. Approximate delay between data collection and dissemination:

0 days

7.4.1. If delay is longer than latency of automated processing, indicate under what authority data access is delayed:

No Delay

8. Data Preservation and Protection

The NOAA Procedure for Scientific Records Appraisal and Archive Approval describes how to identify, appraise and decide what scientific records are to be preserved in a NOAA archive.

8.1. Actual or planned long-term data archive location:

(Specify NCEI-MD, NCEI-CO, NCEI-NC, NCEI-MS, World Data Center (WDC) facility, Other, To Be Determined, Unable to Archive, or No Archiving Intended)

NCEI_MD

8.1.1. If World Data Center or Other, specify:

8.1.2. If To Be Determined, Unable to Archive or No Archiving Intended, explain:

8.2. Data storage facility prior to being sent to an archive facility (if any):

Northwest Fisheries Science Center - Seattle, WA

8.3. Approximate delay between data collection and submission to an archive facility:

365

8.4. How will the data be protected from accidental or malicious modification or deletion prior to receipt by the archive?

Discuss data back-up, disaster recovery/contingency planning, and off-site data storage relevant to the data collection

The Northwest Fisheries Science Center facilitates backup and recovery of all data and IT components which are managed by IT Operations through the capture of static (point-in-time) backup data to physical media. Once data is captured to physical media (every 1-3 days), a duplicate is made and routinely (weekly) transported to an offsite archive facility where it is maintained throughout the data's applicable life-cycle.

9. Additional Line Office or Staff Office Questions

Line and Staff Offices may extend this template by inserting additional questions in this section.
