Please provide the following information, and submit to the NOAA DM Plan Repository.

Reference to Master DM Plan (if applicable)

As stated in Section IV, Requirement 1.3, DM Plans may be hierarchical. If this DM Plan inherits provisions from a higher-level DM Plan already submitted to the Repository, then this more-specific Plan only needs to provide information that differs from what was provided in the Master DM Plan.

URL of higher-level DM Plan (if any) as submitted to DM Plan Repository:

1. General Description of Data to be Managed

1.1. Name of the Data, data collection Project, or data-producing Program:
US Tuna Cannery Receipts

1.2. Summary description of the data:
The data set contains receipts of tuna destined for canning, from both domestic and imported sources, at cannery locations within the 50 states, Puerto Rico, and American Samoa. Monthly data are available electronically from 1979 to present with new data currently uploaded annually (this may change to quarterly or monthly uploads sometime in 2020). Data elements include species, product condition, flag of catcher vessel, ocean area of harvest, harvesting gear type, harvesting vessel trip dates, unloading dates, carrier vessel name, location, cannery location, fishing vessel registration number, weights and dolphin-safe status. Non-summarized proprietary data are considered business confidential.

1.3. Is this a one-time data collection, or an ongoing series of measurements?
Ongoing series of measurements

1.4. Actual or planned temporal coverage of the data:
1979 to Present

1.5. Actual or planned geographic coverage of the data:
Tuna cannery receipts originate from multiple fisheries in the Pacific Ocean, Atlantic Ocean, Indian Ocean, Mediterranean Sea and to some extent, the Caribbean Sea, from both domestic and foreign-flagged vessels.

1.6. Type(s) of data:
(e.g., digital numeric data, imagery, photographs, video, audio, database, tabular data, etc.)
Table (digital)

1.7. Data collection method(s):
(e.g., satellite, airplane, unmanned aerial system, radar, weather station, moored buoy, research vessel, autonomous underwater vehicle, animal tagging, manual surveys, enforcement activities, numerical model, etc.)
Instrument: Pelagic Longline, Purse Seine

1.8. If data are from a NOAA Observing System of Record, indicate name of system:

1.8.1. If data are from another observing system, please specify:

2. Point of Contact for this Data Management Plan (author or maintainer)

2.1. Name:
William Jacobson

2.2. Title:
Metadata Contact

2.3. Affiliation or facility:

2.4. E-mail address:
bill.jacobson@noaa.gov

2.5. Phone number:
562-980-4035

3. Responsible Party for Data Management
Program Managers, or their designee, shall be responsible for assuring the proper management of the data produced by their Program. Please indicate the responsible party below.

3.1. Name:
William Jacobson

3.2. Title:
Data Steward

4. Resources
Programs must identify resources within their own budget for managing the data they produce.

4.1. Have resources for management of these data been identified?
Yes

4.2. Approximate percentage of the budget for these data devoted to data management (specify percentage or "unknown"):
Unknown

5. Data Lineage and Quality
NOAA has issued Information Quality Guidelines for ensuring and maximizing the quality, objectivity, utility, and integrity of information which it disseminates.

5.1. Processing workflow of the data from collection or acquisition to making it publicly accessible

(describe or provide URL of description):

Lineage Statement:
Tuna receipts obtained from direct fishing boat unloadings, as well as from carrier vessel unloadings. Tuna receipts originate from both domestic and imported sources.

Process Steps:
- Monthly cannery receipts reports are received electronically by the TTVP from U.S. tuna canners.
- Data reviewed for regulatory compliance against associated NOAA Form 370s.
- Data is "scrubbed" (i.e., checked) of errors and for consistency of reporting prior to upload into an Oracle database table.

5.1.1. If data at different stages of the workflow, or products derived from these data, are subject to a separate data management plan, provide reference to other plan:

5.2. Quality control procedures employed (describe or provide URL of description):
Monthly data reports received are review monthly for dolphin-safe regulatory compliance purposes and are cleaned/scrubbed annually, prior to upload into the database.

6. Data Documentation
The EDMC Data Documentation Procedural Directive requires that NOAA data be well documented, specifies the use of ISO 19115 and related standards for documentation of new data, and provides links to resources and tools for metadata creation and validation.

6.1. Does metadata comply with EDMC Data Documentation directive?
Yes

6.1.1. If metadata are non-existent or non-compliant, please explain:

6.2. Name of organization or facility providing metadata hosting:
NMFS Office of Science and Technology

6.2.1. If service is needed for metadata hosting, please indicate:

6.3. URL of metadata folder or data catalog, if known:
https://www.fisheries.noaa.gov/inport/item/12852

6.4. Process for producing and maintaining metadata
(describe or provide URL of description):
Metadata produced and maintained in accordance with the NOAA Data Documentation Procedural Directive: https://nosc.noaa.gov/EDMC/DAARWG/docs/EDMC_PD-Data_Documentation_v1.pdf

7. Data Access

NAO 212-15 states that access to environmental data may only be restricted when distribution is explicitly limited by law, regulation, policy (such as those applicable to personally identifiable information or protected critical infrastructure information or proprietary trade information) or by security requirements. The EDMC Data Access Procedural Directive contains specific guidance, recommends the use of open-standard, interoperable, non-proprietary web services, provides information about resources and tools to enable data access, and includes a Waiver to be submitted to justify any approach other than full, unrestricted public access.

7.1. Do these data comply with the Data Access directive?

Yes

7.1.1. If the data are not to be made available to the public at all, or with limitations, has a Waiver (Appendix A of Data Access directive) been filed?

7.1.2. If there are limitations to public data access, describe how data are protected from unauthorized access or disclosure:

7.2. Name of organization of facility providing data access:

7.2.1. If data hosting service is needed, please indicate:

NCEI appropriate data distributer

7.2.2. URL of data access service, if known:

7.3. Data access methods or services offered:

Contact the William Jacobson with the Tuna Tracking and Verification Program (NMFS West Coast Region, Long Beach office) at 562-980-4035 or at bill.jacobson@noaa.gov.

7.4. Approximate delay between data collection and dissemination:

one year

7.4.1. If delay is longer than latency of automated processing, indicate under what authority data access is delayed:

Data is currently uploaded into the database once a year.

8. Data Preservation and Protection

The NOAA Procedure for Scientific Records Appraisal and Archive Approval describes how to identify, appraise and decide what scientific records are to be preserved in a NOAA archive.

8.1. Actual or planned long-term data archive location:

(Specify NCEI-MD, NCEI-CO, NCEI-NC, NCEI-MS, World Data Center (WDC) facility, Other, To Be Determined, Unable to Archive, or No Archiving Intended)

TO_BE_DETERMINED

8.1.1. If World Data Center or Other, specify:

8.1.2. If To Be Determined, Unable to Archive or No Archiving Intended, explain:

8.2. Data storage facility prior to being sent to an archive facility (if any):
West Coast Regional Office - Long Beach, CA

Data collected by the TTVP, at the NMFS Long Beach, California office. The database is housed on a NMFS Office of Science and Technology server in Silver Spring, MD.

8.3. Approximate delay between data collection and submission to an archive facility:
Unknown

8.4. How will the data be protected from accidental or malicious modification or deletion prior to receipt by the archive?
Discuss data back-up, disaster recovery/contingency planning, and off-site data storage relevant to the data collection
secured network environment

9. Additional Line Office or Staff Office Questions
Line and Staff Offices may extend this template by inserting additional questions in this section.
