

Please provide the following information, and submit to the NOAA DM Plan Repository.

### Reference to Master DM Plan (if applicable)

As stated in Section IV, Requirement 1.3, DM Plans may be hierarchical. If this DM Plan inherits provisions from a higher-level DM Plan already submitted to the Repository, then this more-specific Plan only needs to provide information that differs from what was provided in the Master DM Plan.

**5.1. Processing workflow of the data from collection or acquisition to making it publicly accessible**

*(describe or provide URL of description):*

Process Steps:

- 2004-04-01 00:00:00 - NGS processed in field. NOAA Cessna Citation Acquired in April 2004 Optech ALTM 2050 system 4,000 ft AGL ~1-2 m post spacing Nav data was

from an Applanix POS processed with the POSPAC software Laser data processed with Optech's REALM software. LAS files generated with LAsTools  
 - 2009-07-26 00:00:00 - The NOAA Office for Coastal Management (OCM) received the files in LAS format. The data were in UTM zone 10. OCM performed the following processing to the data to make it available within Digital Coast: 1. The data were classified using LASEdit 2. The data were converted from UTM coordinates to geographic coordinates. 3. The LAS data were sorted by latitude and the headers were updated. 4. The data were filtered to remove outliers.

**5.1.1. If data at different stages of the workflow, or products derived from these data, are subject to a separate data management plan, provide reference to other plan:**

**5.2. Quality control procedures employed (describe or provide URL of description):**

## 6. Data Documentation

*The EDMC Data Documentation Procedural Directive requires that NOAA data be well documented, specifies the use of ISO 19115 and related standards for documentation of new data, and provides links to resources and tools for metadata creation and validation.*

**7. Data Access**

*NAO 212-15 states that access to environmental data may only be restricted when distribution is explicitly limited by law, regulation, policy (such as those applicable to personally identifiable information or protected critical infrastructure information or proprietary trade information) or by security requirements.
