Please provide the following information, and submit to the NOAA DM Plan Repository.

Reference to Master DM Plan (if applicable)

As stated in Section IV, Requirement 1.3, DM Plans may be hierarchical. If this DM Plan inherits provisions from a higher-level DM Plan already submitted to the Repository, then this more-specific Plan only needs to provide information that differs from what was provided in the Master DM Plan.

URL of higher-level DM Plan (if any) as submitted to DM Plan Repository:

1. General Description of Data to be Managed

1.1. Name of the Data, data collection Project, or data-producing Program:
Federal Weather Radar Impact Zones

1.2. Summary description of the data:
These data represent an inventory of the national impacts of wind turbine interference with NEXRAD radar stations. This inventory was developed by the NOAA Radar Operations Center (ROC) to establish variable zones that delineate the possible impacts that wind turbines may have on radar operations. The inventory scheme includes four zones that take into account terrain, distance, and the number of elevation angles impacted. ROC requests various degrees of consultation with the developer depending on the zone. No Build - No wind turbines permitted Mitigation Zone - Significant impacts likely Consultation Zone - Significant impacts possible Notification Zone - Impacts not likely

1.3. Is this a one-time data collection, or an ongoing series of measurements?
One-time data collection

1.4. Actual or planned temporal coverage of the data:
2015-09-01

1.5. Actual or planned geographic coverage of the data:

1.6. Type(s) of data:
(e.g., digital numeric data, imagery, photographs, video, audio, database, tabular data, etc.)

1.7. Data collection method(s):
(e.g., satellite, airplane, unmanned aerial system, radar, weather station, moored buoy, research vessel, autonomous underwater vehicle, animal tagging, manual surveys, enforcement activities, numerical model, etc.)

1.8. If data are from a NOAA Observing System of Record, indicate name of system:
1.8.1. If data are from another observing system, please specify:

2. Point of Contact for this Data Management Plan (author or maintainer)

   2.1. Name:

   2.2. Title:
       Metadata Contact

   2.3. Affiliation or facility:

   2.4. E-mail address:

   2.5. Phone number:

3. Responsible Party for Data Management

   Program Managers, or their designee, shall be responsible for assuring the proper management of
   the data produced by their Program. Please indicate the responsible party below.

   3.1. Name:

   3.2. Title:
       Data Steward

4. Resources

   Programs must identify resources within their own budget for managing the data they produce.

   4.1. Have resources for management of these data been identified?

   4.2. Approximate percentage of the budget for these data devoted to data management (specify percentage or "unknown"):

5. Data Lineage and Quality

   NOAA has issued Information Quality Guidelines for ensuring and maximizing the quality,
   objectivity, utility, and integrity of information which it disseminates.

   5.1. Processing workflow of the data from collection or acquisition to making it publicly accessible
       (describe or provide URL of description):
       Process Steps:
- 2015-07-01 00:00:00 - • Original source data was provided by NOAA Radar Operations Center • Import 4 shapefiles into a file geodatabase • Project 4 feature classes into NAD83 • Update attribute names to siteID and siteName • Add impactZone field to each feature class • Populate the fields so that GREEN = Notification Zone, YELLOW = Consultation Zone, ORANGE = Mitigation Zone and RED = No Build Zone • Dissolve each feature class based on siteID, siteName, and impactZone, unselecting multi-part features • Integrate each feature class at 1 foot tolerance to clean up most of the slivers in the data • Dissolve each feature class again based on siteID, siteName, and impactZone, unselecting multi-part features • Erase RED from ORANGE and Merge the new hollow ORANGE with RED • Union this new ORANGE-RED, and split and merge overlaps in the Mitigation Zone only • Erase the new ORANGE-RED from YELLOW and Merge the new hollow YELLOW with ORANGE-RED • Union this new YELLOW-ORANGE-RED, and split and merge overlaps in the Consultation Zone only • Erase the new YELLOW-ORANGE-RED from GREEN and Merge the new hollow GREEN with YELLOW-ORANGE-RED • Union this new GREEN-YELLOW-ORANGE-RED, and split and merge overlaps in the Notification Zone only • Delete from the No Build Zone features: Camp Humphreys, Kadena AB, Kunsan AB, Lajes AB and Langley Hill • Select by Attributes where siteID = 'PAHG', and populate so that all features have siteName = 'Kenai FAA (RDA1)' • Integrate new feature class at 20 feet tolerance to further clean up data slivers • Check geometry and project data into WGS 1984 Auxiliary Sphere

5.1.1. If data at different stages of the workflow, or products derived from these data, are subject to a separate data management plan, provide reference to other plan:

5.2. Quality control procedures employed (describe or provide URL of description):

6. Data Documentation

The EDMC Data Documentation Procedural Directive requires that NOAA data be well documented, specifies the use of ISO 19115 and related standards for documentation of new data, and provides links to resources and tools for metadata creation and validation.

6.1. Does metadata comply with EDMC Data Documentation directive?

No

6.1.1. If metadata are non-existent or non-compliant, please explain:

Missing/invalid information:

- 1.6. Type(s) of data
- 1.7. Data collection method(s)
- 2.1. Point of Contact Name
- 2.4. Point of Contact Email
- 3.1. Responsible Party for Data Management
- 4.1. Have resources for management of these data been identified?
4.2. Approximate percentage of the budget for these data devoted to data management
5.2. Quality control procedures employed
7.1. Do these data comply with the Data Access directive?
7.1.1. If data are not available or has limitations, has a Waiver been filed?
7.1.2. If there are limitations to data access, describe how data are protected
7.2. Name of organization of facility providing data access
7.2.1. If data hosting service is needed, please indicate
7.3. Data access methods or services offered
7.4. Approximate delay between data collection and dissemination
8.1. Actual or planned long-term data archive location
8.2. Data storage facility prior to being sent to an archive facility
8.3. Approximate delay between data collection and submission to an archive facility
8.4. How will the data be protected from accidental or malicious modification or deletion prior to receipt by the archive?

6.2. Name of organization or facility providing metadata hosting:
NMFS Office of Science and Technology
6.2.1. If service is needed for metadata hosting, please indicate:

6.3. URL of metadata folder or data catalog, if known:
https://www.fisheries.noaa.gov/inport/item/57239

6.4. Process for producing and maintaining metadata
   (describe or provide URL of description):
Metadata produced and maintained in accordance with the NOAA Data Documentation Procedural Directive: https://nosc.noaa.gov/EDMC/DAARWG/docs/EDMC_PD-Data_Documentation_v1.pdf

7. Data Access
NAO 212-15 states that access to environmental data may only be restricted when distribution is explicitly limited by law, regulation, policy (such as those applicable to personally identifiable information or protected critical infrastructure information or proprietary trade information) or by security requirements. The EDMC Data Access Procedural Directive contains specific guidance, recommends the use of open-standard, interoperable, non-proprietary web services, provides information about resources and tools to enable data access, and includes a Waiver to be submitted to justify any approach other than full, unrestricted public access.

7.1. Do these data comply with the Data Access directive?

7.1.1. If the data are not to be made available to the public at all, or with limitations, has a Waiver (Appendix A of Data Access directive) been filed?
7.1.2. If there are limitations to public data access, describe how data are protected from unauthorized access or disclosure:

7.2. Name of organization of facility providing data access:

7.2.1. If data hosting service is needed, please indicate:

7.2.2. URL of data access service, if known:
   https://marinecadastre.gov/data/

7.3. Data access methods or services offered:

7.4. Approximate delay between data collection and dissemination:

7.4.1. If delay is longer than latency of automated processing, indicate under what authority data access is delayed:

8. Data Preservation and Protection
The NOAA Procedure for Scientific Records Appraisal and Archive Approval describes how to identify, appraise and decide what scientific records are to be preserved in a NOAA archive.

8.1. Actual or planned long-term data archive location:
(Specify NCEI-MD, NCEI-CO, NCEI-NC, NCEI-MS, World Data Center (WDC) facility, Other, To Be Determined, Unable to Archive, or No Archiving Intended)

8.1.1. If World Data Center or Other, specify:

8.1.2. If To Be Determined, Unable to Archive or No Archiving Intended, explain:

8.2. Data storage facility prior to being sent to an archive facility (if any):
   Charleston, SC

8.3. Approximate delay between data collection and submission to an archive facility:

8.4. How will the data be protected from accidental or malicious modification or deletion prior to receipt by the archive?
Discuss data back-up, disaster recovery/contingency planning, and off-site data storage relevant to the data collection
9. Additional Line Office or Staff Office Questions

*Line and Staff Offices may extend this template by inserting additional questions in this section.*
