

7th Scientific Coordination Sub-Committee Meeting

<https://www.npfmc.org/SCS7/>

Sitka, AK August 2022

1 How to incorporate ecosystem indicators into the stock assessment process?

2 Developing information to support management of interacting species in consideration of ecosystem-based fishery management (EBFM).

3 How to assess and develop fishing level recommendations for species exhibiting distributional changes?

KEY FINDINGS

- 1 Councils need to start preparing now for increasingly complex management decisions due to climate change**
- 2 Investment is needed in the development of new data collection and analysis tools that are responsive to changing conditions**
- 3 SSCs and Councils need to be prepared to transition toward a more sophisticated toolbox**
- 4 Stakeholder engagement will be critical for adaptive management to be successful**
