

Justification analysis and general outline of info needed:

1. Describe the PDC restrictions and what they protect.
2. Describe how the project deviates from the PDC.
3. Analyze/describe how the stressors (intensity and/or extent) do or do not deviate from what was considered in the consultation for the NLAA program.
4. If it deviates from what was considered in the NLAA program, analyze/describe why the difference in stressor intensity and/or extent will not result in effects not considered in the consultation. (If it does, then a regular informal is required.).
5. Analyze effects for whether they will result in adverse effects or not.
6. Make a determination of either “insignificant” or “extremely unlikely to occur”.
