Section C – EM Installation

This section is to be completed by the employee of the EM service provider that installed the EM system and associated equipment.

The EM system installed must meet the performance standards below as required by 50 CFR 660.604(j). The specifications (e.g., image resolution, frame rate, user interface) and configuration of an EM system and associated equipment (e.g., number and placement of cameras, lighting) must be sufficient to:

- (1) Allow easy and complete viewing, identification, and quantification, of catch items discarded at sea, including during low light conditions;
- (2) Continuously record vessel location (latitude/longitude coordinates), velocity, course, and sensor data (i.e, hydraulic and winch activity);
- (3) Allow the identification of the time, date, and location of a haul/set or discard event;
- (4) Record and store image data from all hauls/sets and the duration that fish are onboard the vessel until offloading begins;
- (5) Continuously record and store raw sensor data (i.e., GPS and gear sensors) for the entire fishing trip;
- (6) Prevent radio frequency interference (RFI) with vessel monitoring systems (VMS) and other equipment;
- (7) Allow the vessel operator to test and monitor the functionality of the EM system prior to and during the fishing trip to ensure it is fully functional;
- (8) Prevent tampering or, if tampering does occur, show evidence of tampering; and,
- (9) Provide image and sensor data in a format that enables their integration for analysis.

Please Note: All of the questions below must be answered for the application to be considered complete.

If you cannot affirm any of these statements or are unsure, check “No” and attach to the application relevant information to enable NMFS to make a decision.
