MAIN POOL AND WINDOW OF WONDER

THE RUTH & J.O. STONE DOLPHIN COMPLEX
FUTURE HOME OF WINTER THE DOLPHIN & COMPANIONS

- FIVE POOLS
- NINE WINDOWS
- 1.5 MILLION GALLONS

The separate complex and pools behind this window hold 1.5 million gallons of seawater and will soon be the new home for all of our rescued, non-releasable dolphins. While our mission is to Rescue, Rehab, and Release all Marine life, some individuals are unable to survive in the wild after their rescue. These new pools really expand our resident dolphins' habitats, improving the quality of their lives and the care that we provide.

KATE TIEDEMANN & ELLEN COTTON
MAIN POOL & WINDOW

The Main Pool in front of you holds 630,300 gallons of seawater and will soon be the new home for many of our resident dolphins. They will be able to see you are looking through one of the largest acrylic windows in the world.

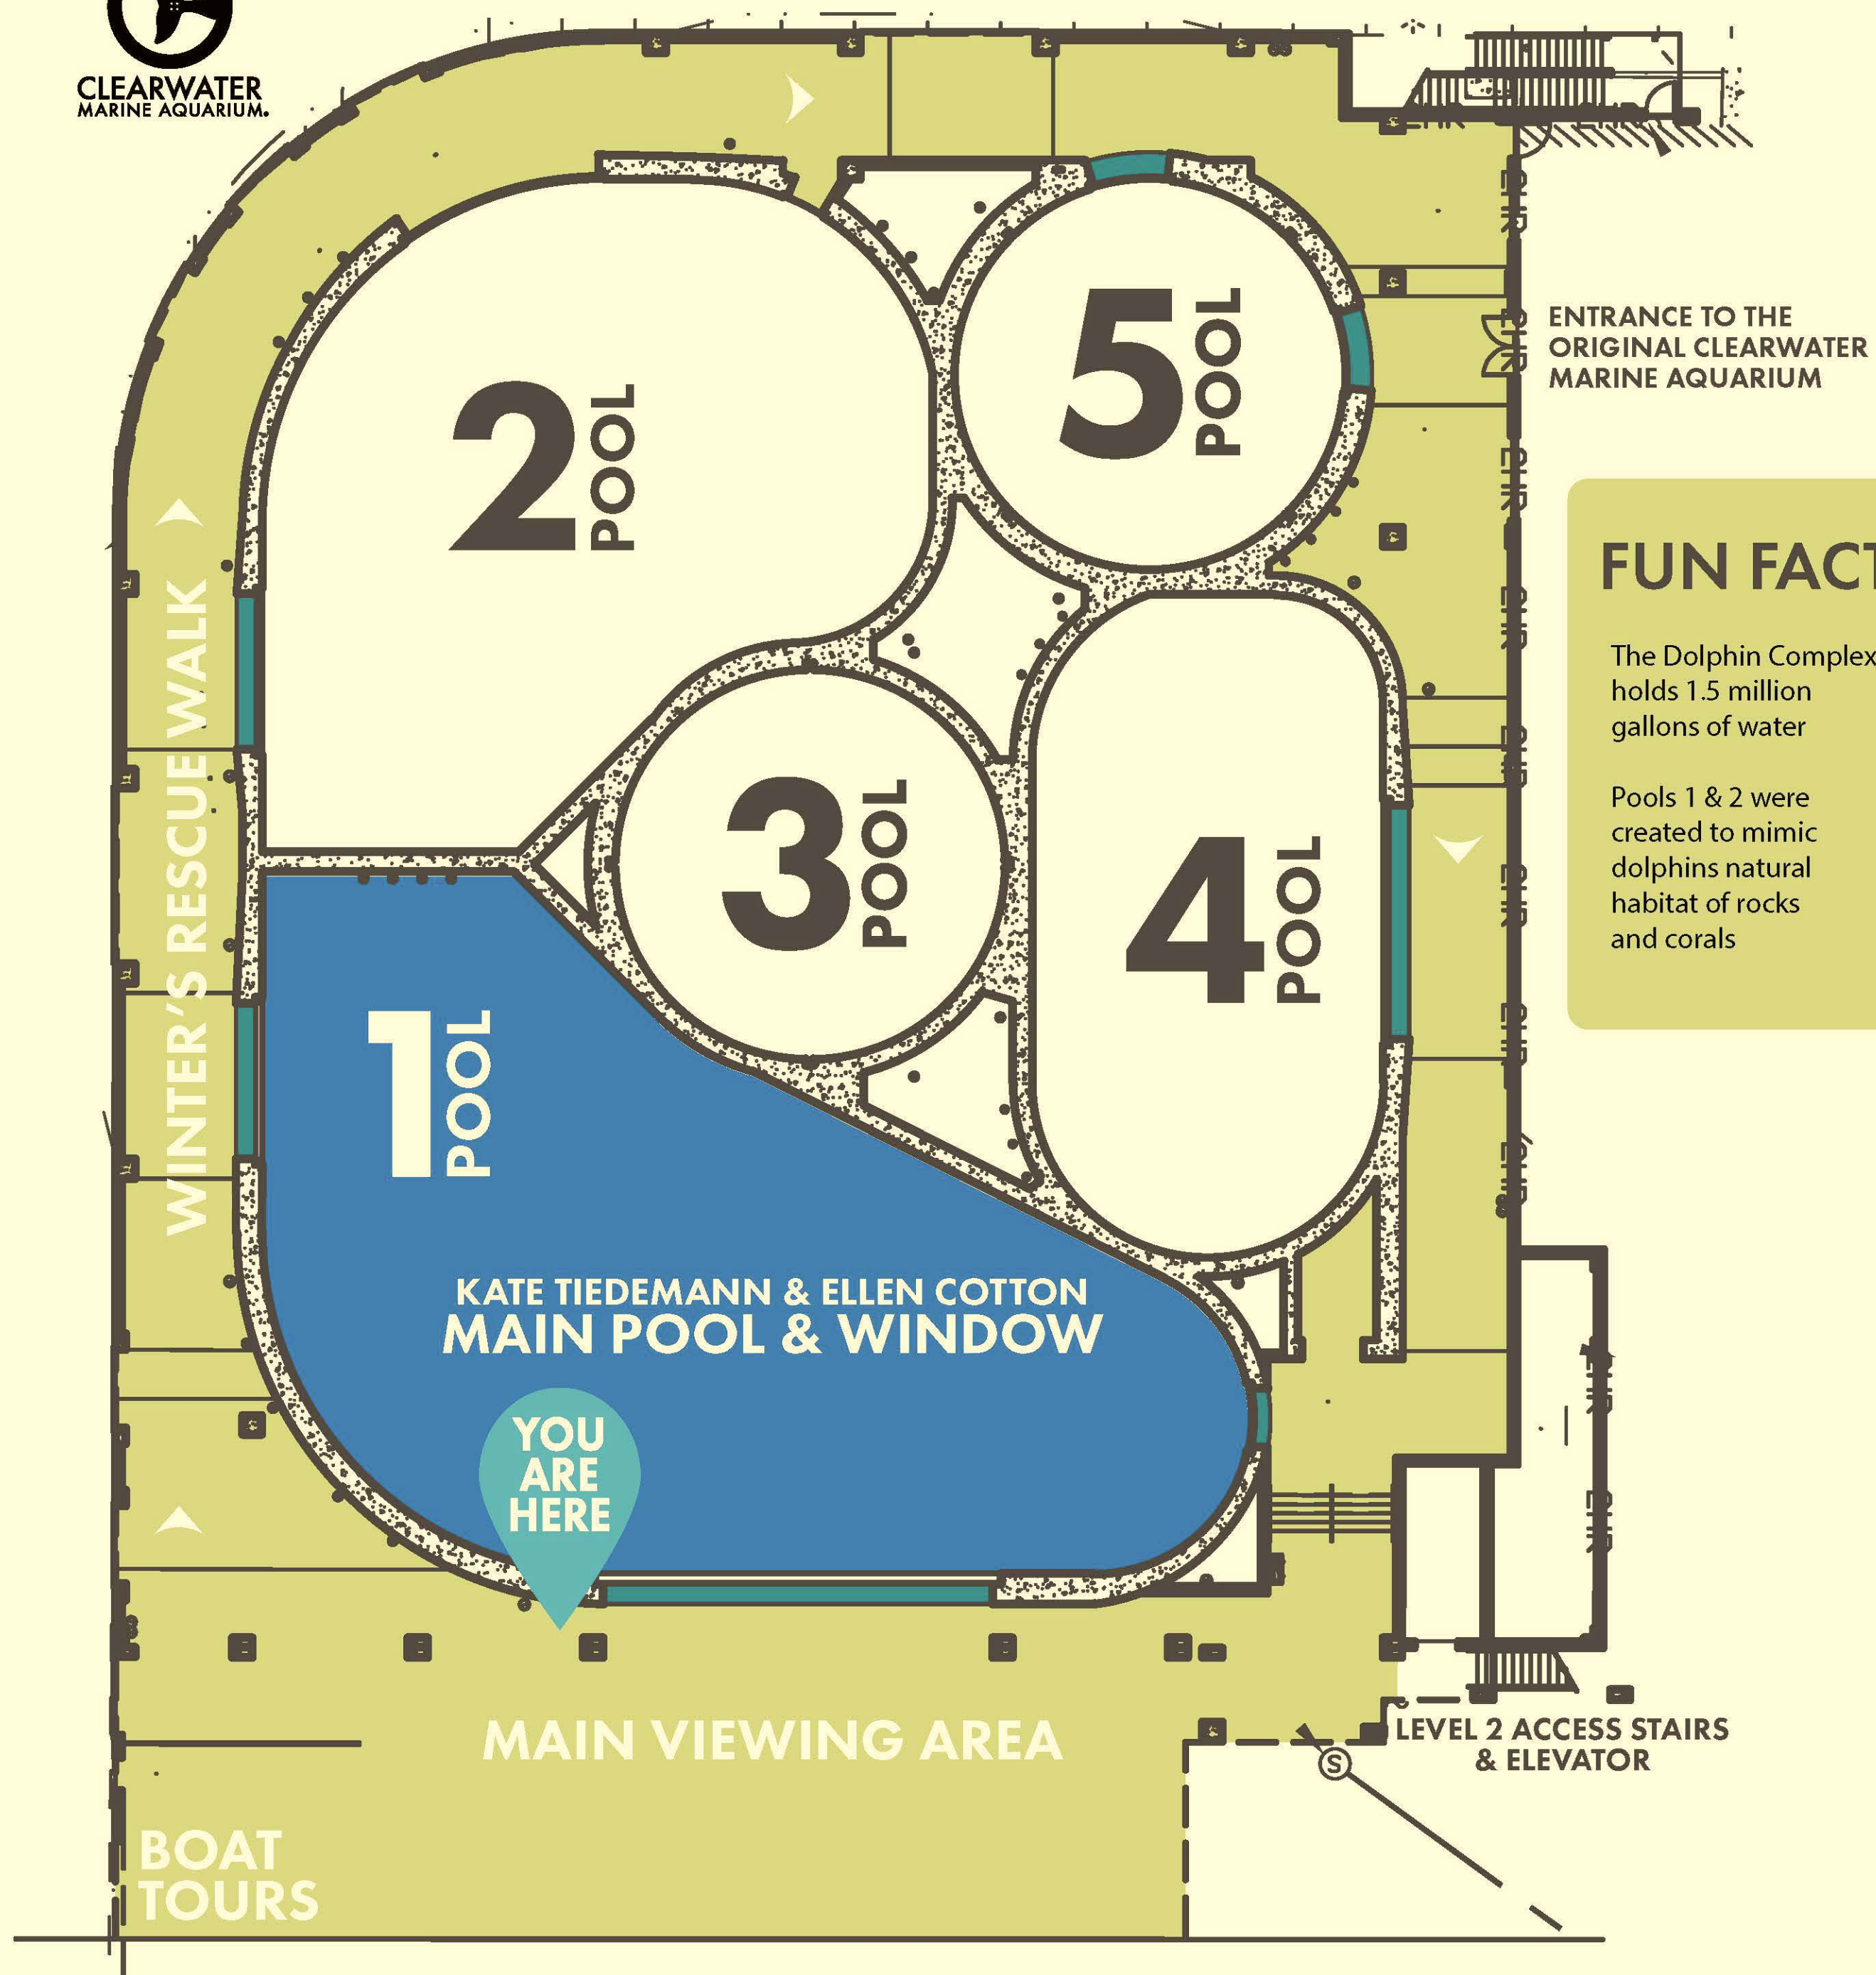

12,584 cu ft | 8177 sq ft | 1687 high | 17,000 sq ft
