Dear Dr. Dold, Dr. Coughlin, and Mr. Burke:

Thank you for your letter submitted on behalf of SeaWorld of California, SeaWorld of Texas, John G. Shedd Aquarium, and Georgia Aquarium[1] requesting an emergency import authorization to rescue up to 28 beluga whales (*Delphinapterus leucas*) from Marineland of Canada (MoC) in Niagara Falls, Ontario, Canada, into the United States. Please refer to Appendix A for a list of the belugas to be imported and the destination facilities.

It is our understanding that MoC has been closed since 2024, and these animals need to be rescued as soon as possible to receive medical treatment that is not otherwise available. We also understand that MoC is operating beyond its capacity to provide

[1] The letter was signed by Dr. Christopher Dold on behalf of United Parks & Resorts Inc.; Travis Burke on behalf of Georgia Aquarium; and Bridget Coughlin, PhD, on behalf of John G. Shedd Aquarium.

consistent, adequate care for the animals, and the whales are health-compromised. In addition, MoC has indicated that, absent authorization for relocation or alternative intervention, they will be unable to continue to provide for the animals' care, and instead will euthanize these animals. We also understand there is no other viable option for the whales in Canada. Your facilities in the United States are among the few available to transport and hold these beluga whales immediately and can provide the necessary medical care for these animals.

Thank you for providing a copy of the CITES export permit issued by the Government of Canada. Please also provide a copy of the additional pending federal export permit issued by the Government of Canada prior to importing the animals.

Enclosed is **Cooperative Agreement No. 2026-01**, to be entered into pursuant to Sections 109(h) and 112(c) of the Marine Mammal Protection Act (MMPA) (16 U.S.C. 1379(h) and 16 U.S.C. 1382(c)) between the National Marine Fisheries Service and the Receiving Facilities. This Agreement designates the Receiving Facilities as persons eligible to import the beluga whales identified in Appendix A for the purpose of providing medical treatment and care that is otherwise unavailable, pursuant to Section 109(h) of the MMPA and subject to the terms of this Agreement.

This Agreement will take effect upon signature by all Parties. Please sign and date the signature page and return the signed agreement to our office via return email. The transport and subsequent holding of marine mammals in reliance on this Agreement must occur in compliance with the provisions of the Animal Welfare Act (AWA) and its implementing regulations (9 CFR, Chapter 1, Subchapter A, Parts 1-4). Please contact Dr. Kelly Helmick at the U.S. Department of Agriculture's Animal and Plant Health Inspection Service (USDA/APHIS) at Kelly.Helmick@usda.gov for details on the AWA standards for transporting marine mammals. The importation of marine mammals is also subject to U.S. Fish and Wildlife Service (USFWS) regulations including 50 CFR Part 14 (Designated Ports and Declaration) and Part 23 (Convention on International Trade in Endangered Species of Wild Fauna and Flora).

When these animals arrive at their destinations, please complete Table A1 - custody and facility dates, as well as identifications for each animal, and return the spreadsheet to our Office within 5 days.

If you have any questions concerning the enclosed Agreement or its reporting requirements or any other authorities that may apply to this rescue, please contact Trevor.Spradlin@noaa.gov, Jennifer.Skidmore@noaa.gov and Courtney.Smith@noaa.gov.

Sincerely,

Kimberly Damon-Randall
Director, Office of Protected Resources

COOPERATIVE AGREEMENT BETWEEN

NOAA/NATIONAL MARINE FISHERIES SERVICE
AND
UNITED PARKS & RESORTS, INC., SEAWORLD PARKS & ENTERTAINMENT, INC., SEA WORLD, LLC, SHEDD AQUARIUM SOCIETY, AND GEORGIA AQUARIUM, INC.

COOPERATIVE AGREEMENT NO. 2026-01

This Agreement is entered into under the authority of Sections 109(h) and 112(c) of the Marine Mammal Protection Act of 1972 (MMPA) (16 U.S.C. 1379(h) and 16 U.S.C. 1382(c)) by and between the National Marine Fisheries Service (NMFS), National Oceanic Atmospheric Administration, U.S. Department of Commerce; and United Parks & Resorts, Inc., 6240 Sea Harbor Drive, Orlando, FL 32821; SeaWorld Parks & Entertainment, Inc., 6240 Sea Harbor Drive, Orlando, FL 32821; Sea World, LLC, 7007 SeaWorld Drive, Orlando, FL 32821; Shedd Aquarium Society (dba John G. Shedd Aquarium), 1200 South Dusable Lake Shore Drive, Chicago, IL 60605; and Georgia Aquarium, Inc., 225 Baker St. NW, Atlanta, GA 30313 (collectively, “the Parties”).

Those executing this Agreement on behalf of United Parks & Resorts, Inc., SeaWorld Parks & Entertainment, Inc., Sea World, LLC, John G. Shedd Aquarium, and Georgia Aquarium (hereafter, collectively, “Receiving Facilities” or individually as to each, “Receiving Facility”), represent and warrant that they have been duly authorized to bind the Receiving Facilities to the terms and conditions of this Agreement. Further, United Parks & Resorts Inc., SeaWorld Parks & Entertainment, Inc., and Sea World, LLC represent and warrant that they have been duly authorized to bind the destination facilities SeaWorld of California and SeaWorld of Texas to the terms and conditions of this Agreement.

The Parties have entered into this Agreement for the purpose of importing up to 28 beluga whales (*Delphinapterus leucas*) from Marineland of Canada in Niagara Falls, Ontario, Canada to render medical treatment that is not otherwise available. This Agreement signed by all of the Parties hereto constitutes a final written expression of all the terms of this Agreement and the Parties agree that they are not relying on any written or oral representations not included herein. Receiving Facilities waive any rule of construction or law which construes and interprets the terms of an

agreement against the drafting party. The provisions of this Agreement may be amended upon mutual agreement by all Parties in writing.

The Parties agree to the following terms:

1. The Receiving Facilities are hereby designated as persons eligible to import the beluga whales identified in Appendix A pursuant to Section 109(h)(2) of the MMPA (16 U.S.C. 1379(h)(2)), subject to the terms and conditions of this Agreement. The Receiving Facilities agree to comply with all terms and conditions listed in, or made part of, this Agreement.

2. The beluga whales imported pursuant to this Agreement shall be placed under the care and custody of the Receiving Facilities following importation and until such time that any other disposition is made in accordance with Paragraph 4 below and any applicable regulations. A violation of any of the terms and conditions of this Agreement shall subject the Receiving Facility, any agent of such Receiving Facility operating under the authority of this Agreement, or both, to penalties, enforcement procedures, and other limitations provided under the MMPA or other applicable law.

3. For any beluga whales that may be imported pursuant to this Agreement:

    a. a copy of any required export permit(s) issued by the Government of Canada must be submitted to NMFS before any beluga whales may be imported pursuant to this Agreement, and
    b. the following documentation must accompany the beluga whales and be kept with the Agreement:
        1. a certification from a duly licensed veterinarian stating that the planned protocols for the transport and acclimation to their destinations of beluga whales to be imported pursuant to this Agreement are acceptable;
        2. a certification that each beluga whale that will be in the custody of a Receiving Facility as set forth in Appendix A to this Agreement is in sufficiently stable condition to be transported;
        3. a current copy of the U.S. Department of Agriculture’s Animal and Plant Health Inspection Service (USDA/APHIS) license for any facility under its control in which any beluga to be imported pursuant to this Agreement will be placed.

4. Beluga whales imported pursuant to this Agreement shall be considered to be held for rehabilitation under 50 CFR 216.27, and disposition of such beluga whales shall be governed by 50 CFR 216.27. Notwithstanding the preceding sentence, any obligations in this Agreement that are more specific than those in 50 CFR 216.27 shall govern. MMPA Section 109(h)(3) requires that steps be taken to return a marine mammal imported pursuant to Section 109(h)(2) to its natural habitat, if feasible. NMFS will make such determination within a reasonable period following importation, in accordance with 50 CFR 216.27, and the Receiving Facilities agree to provide NMFS information necessary to determine whether release is feasible, including but not limited to a report by each attending veterinarian as described in 50 CFR 216.27.

5. The Receiving Facilities agree to comply with the following conditions and methods of care, maintenance, and transportation:

    a. Each beluga whale imported under this Agreement may be maintained only in an APHIS-licensed facility.

    b. The required methods of care, maintenance, and transportation are those established by APHIS under the Animal Welfare Act (AWA) and AWA implementing regulations (9 CFR, Chapter 1, Subchapter A, Parts 1-4).

    c. A copy of this Agreement must be included in the records of each beluga whale imported pursuant to this Agreement at the respective Receiving Facility and accompany such beluga whale during any transport.

    d. Any public display of beluga whales imported pursuant to this Agreement may not interfere with the care and maintenance of such beluga whales. Any such display must include an educational component that informs the public of the status of the species under the MMPA and provides information regarding the natural history, distribution, population status, and threats to the species. Public demonstrations in which the beluga whales perform trained enrichment, husbandry, or medical behaviors are authorized. Public display may not be conducted in a manner that prejudices possible release to the wild (i.e., the beluga whales must not be trained for performance or included in any interactive program with the public [e.g., where the public touches, feeds, or is photographed with such beluga whales]) unless approved by the Director, Office of Protected Resources (hereafter “Office Director”).

e. Non-intrusive[1] scientific research activities may be conducted opportunistically (e.g., behavioral observations, husbandry sampling) at the discretion of the Attending Veterinarian and concurrently with the routine care, including health assessments and medical treatments, and husbandry of the beluga whales imported pursuant to this Agreement. Intrusive research may not be conducted on the beluga whales without further authorization by NMFS.

6. The Receiving Facilities may not transfer, transport, export, or otherwise dispose of any beluga imported pursuant to this Agreement without the approval of the Office Director, and subject to any terms the Office Director may prescribe. This paragraph shall not apply to transport between the Receiving Facilities identified in this Agreement, provided NMFS is notified and verification of the transport is submitted to NMFS within 5 days.

7. The Receiving Facilities agree to comply with the following reporting and inspection requirements:

   a. Upon completion of the importation of any beluga whale animal pursuant to this Agreement, each Receiving Facility must complete Table A1 - custody and facility dates and identification - for the beluga whale(s) it accepted and submit this spreadsheet to the Office Director, Office of Protected Resources via email (NIMM.Inventory@noaa.gov) within 5 days of such importation.

   b. In the event of the death of any beluga whale imported pursuant to this Agreement, the Receiving Facility having custody of the deceased beluga whale must notify the Office Director within 30 days by submitting a Marine Mammal Data Sheet for the beluga whale. A copy of the necropsy report, histopathology, and any other relevant reports must be made available upon request to NMFS. For a copy of the Marine Mammal Data Sheet, see https://www.fisheries.noaa.gov/national/marine-mammal-protection/national-inventory-marine-mammals.

[1] For captive animals, intrusive research does not include a procedure: (1) conducted by the professional staff of the holding facility or an attending veterinarian for purposes of animal husbandry, care maintenance, or treatment, or a routine medical procedure that, in the reasonable judgment of the attending veterinarian, would not constitute a risk to the health or welfare of the captive animal; or (2) involving either the introduction of a substance or object (i.e., as described in this definition) or a stimulus directed at animals that, in the reasonable judgment of the attending veterinarian, would not involve a risk to the health or welfare of the captive animal. 50 CFR 216.3.

c. Upon request of the Office Director, the Receiving Facility shall review and verify the accuracy of its Marine Mammal Inventory Report Summary (MMIRS). All reports shall be submitted to the Office Director at the email address indicated above, in the requested format.

d. Every 30 days until such time that a disposition is determined in accordance with Paragraph 4 of this Agreement, the Receiving Facility shall submit to NMFS a written health status update for each beluga whale imported pursuant to this Agreement.

e. Upon request of an employee of NOAA or other person designated by the Office Director, the Receiving Facility must make available for inspection: records; facilities; marine mammals; marine mammal parts; copies of photographs, film, and/or video tapes; and any other information related to any inspection of records associated with this Agreement.

8. Each Receiving Facility is responsible for all activities of any person who is operating as an agent of such Receiving Facility under the authority of this Agreement. Individuals conducting activities authorized under this Agreement must possess qualifications commensurate with their duties and responsibilities, or must be under the direct supervision of a person with such qualifications. Persons who require state or Federal licenses or authorizations (e.g., veterinarians) to conduct the authorized activities must be duly licensed/ authorized and follow all applicable requirements when undertaking such activities.

9. NMFS is not responsible for any costs arising out of the importation contemplated by this Agreement, including costs that may arise from any disposition of beluga whales that NMFS may order or authorize pursuant to 50 CFR 216.27(b).

10. This Agreement may be terminated at any time in the event of a breach of this Agreement by the Receiving Facilities, a mutually agreed termination, or this Agreement being superseded by future agreements.

The terms of this Agreement will become effective upon signature of all Parties. This Agreement may be executed in any number of counterparts and by different parties on separate counterparts, each of which counterparts, when so executed and delivered,

shall be deemed to be an original and all of which counterparts, when taken together, shall constitute one and the same Agreement.

June 2, 2026

Trevor Spradlin
Supervisor, Directed Take Program
Office of Protected Species
National Marine Fisheries Service
1315 East West Highway
Silver Spring, MD 20910

Dear Mr. Spradlin:

This letter constitutes an emergency request by SeaWorld of California, SeaWorld of Texas, Georgia Aquarium, and John G. Shedd Aquarium (collectively, the "Receiving Facilities") for immediate authorization under the Marine Mammal Protection Act to import up to twenty-eight belugas (*Delphinapterus leucas*) from Marineland of Canada to safeguard the health and welfare of the animals.

Belugas – Emergency Authorization Request

Pursuant to Sections 1379(h) and 1382(c) of the Marine Mammal Protection Act, 16 USC 1379(h) and 16 USC 1382(c), the Receiving Facilities hereby request emergency authority to import twenty-eight belugas from Marineland of Canada for the health and welfare of the animals. A table identifying the individual animals proposed for import is included as Attachment A.

Request for Emergency Authority to Import Belugas

There is an immediate need to relocate the belugas currently maintained at Marineland in Niagara Falls, Ontario. These animals cannot remain at their current facility. Available information, including documented communications with Canadian authorities and consistent public reporting, indicates that the current facility is operating beyond its capacity to provide consistent, adequate care for the animals. Marineland has indicated that, absent authorization for relocation or alternative intervention, they are unable to continue to provide for the animals' care, and that euthanasia of these animals is the outcome.

There are no facilities within Canada able to receive and manage this population and the belugas cannot be transferred to another facility within Canada due to Canadian legal and regulatory constraints (S.C. 2019, c. 11). Accordingly, Canada's Fisheries Minister has approved the export of these belugas to suitably accredited marine life parks and aquariums in the United States, specifically the Receiving Facilities identified in this request.

The Receiving Facilities represent the nearest and most appropriate institutions with the capacity, expertise, and infrastructure necessary to provide immediate, high-quality care and to execute a complex transport on an expedited timeline. The Receiving Facilities maintain extensive experience in the transport of belugas, a process that requires specialized planning and equipment and must be carefully coordinated. Immediate relocation of the belugas is necessary to protect their health and welfare and to ensure their continued professional care. Delay in authorization would further compromise the condition of the animals, expose them to risk, and limit the feasibility of safe relocation.

The Receiving Facilities meet the requirements for public display under the Marine Mammal Protection Act and its implementing regulations and maintain established beluga programs with the specialized facilities, experienced personnel, and veterinary expertise necessary to safely transport, receive, and manage these animals. Upon arrival, the belugas will be acclimatized under the supervision of experienced veterinary and animal care teams. Considering some of the outcomes associated with prior transports of belugas from this Marineland of Canada population, the Receiving Facilities acknowledge that, as with any marine mammal transport, transport- and acclimatization-related morbidity and mortality are potential risks. Comprehensive veterinary health monitoring and animal management best practices will be implemented by the Receiving Facilities to minimize these risks to the greatest extent feasible.

Accordingly, the Receiving Facilities respectfully request emergency authorization for the import of these belugas from Canada pursuant to Sections 109(h) and 112(c) of the Marine Mammal Protection Act, consistent with prior authorizations granted under these provisions.

Legal Authority for Authorization to Import Belugas

Section 102 of the Marine Mammal Protection Act, 16 U.S.C. 1372, prohibits the taking and importation of marine mammals, except as provided for in several sections of the Act, including Section 109, 16 U.S.C. 1379. Section 109(h)(2) of the Act states:

> Nothing in this title shall prevent the Secretary or a person designated under section 1382(c) of this title from importing a marine mammal into the United States if such importation is necessary to render medical treatment not otherwise available.

16 U.S.C. 1379(h)(2). The House Committee Report on the legislation adding Section 109(h)(2) to the Act indicates that the determination of the availability of medical treatment is based on the availability of such treatment in the country of export. H. Rept. 970, 100th Cong., 2d Sess., p. 32.

Section 109(h)(1) provides that nothing in the Act shall prevent a government official or employee or a person designated under Section 112(c) from taking a marine mammal if such taking is for the protection or welfare of the mammal.

Section 112(c) of the Act authorizes the Secretary to:

> enter into such contracts, leases, cooperative agreements, or other transactions as may be necessary to carry out the purposes of this subchapter and on such terms as he deems appropriate with any Federal or State agency, public or private institution, or other person.

16 U.S.C. 1382(c).

These sections clearly authorize the Agency to enter into a Section 112(c) agreement with the Receiving Facilities to facilitate the import of the belugas into the United States in order to ensure their continued professional care, management, and veterinary oversight for the protection of the health and welfare of the animals.

Conclusion

For the foregoing reasons, this letter contains the information the Agency requires to make the necessary findings under the MMPA to grant emergency authority for the import of the belugas. The Receiving Facilities respectfully request that such authority be immediately granted.

Please feel free to contact any of the undersigned with questions. We look forward to your response. Thank you in advance.

Sincerely,

Christopher Dold, DVM
Chief Zoological Officer, United Parks & Resorts Inc.
